DISCRETE MATHEMATICS

Author index to volume 196 (1999)

Alladi, K., A variation on a theme of Sylvester — a smoother road to Göllnitz's (Big) theorem	(1–3)	1– 11
Bang-Jensen, J., Linkages in locally semicomplete digraphs and quasi-transitive digraphs	(1–3)	13– 27
Brousek, J., Z. Ryjáček and O. Favaron, Forbidden subgraphs, hamiltonicity and closure in claw-free graphs	(1–3)	29– 50
Byer, O.D., Two path extremal graphs and an application to a Ramsey-type problem	(1–3)	51– 64
Caughman IV, J.S., The Terwilliger algebras of bipartite P- and Q-polynomial schemes	(1–3)	65– 95
Chang, G.J., see S.-C. Liaw	(1–3)	219–227
Cheng, C.T. and L.J. Cowen, On the local distinguishing numbers of cycles	(1–3)	97–108
Cowen, L.J., see C.T. Cheng	(1–3)	97–108
Dinski, T. and X. Zhu, A bound for the game chromatic number of graphs	(1–3)	109–115
Dougherty, S.T., T.A. Gulliver and M. Harada, Optimal ternary formally self-dual codes	(1–3)	117–135
Favaron, O., see J. Brousek	(1–3)	29– 50
Fu, T.-S., Erdős–Ko–Rado-type results over $J_q(n, d)$, $H_q(n, d)$ and their designs	(1–3)	137–151
Gräf, A., Distance graphs and the T-coloring problem	(1–3)	153–166
Gulliver, T.A., see S.T. Dougherty	(1–3)	117–135
Harada, M., see S.T. Dougherty	(1–3)	117–135
Hu, Z., A generalization of Fan's condition and forbidden subgraph conditions for hamiltonicity	(1–3)	167–175
Jendrol, S., Triangles with restricted degrees of their boundary vertices in plane triangulations	(1–3)	177–196
Jiang, Z., see V. Linek	(1–3)	229–238
Kashiwagi, Y. and I. Kikumasa, Indecomposability of cyclic codes (*Note*)	(1–3)	277–280
Kikumasa, I., see Y. Kashiwagi	(1–3)	277–280
Knopfmacher, A., On the degrees of irreducible factors of polynomials over a finite field	(1–3)	197–206
Kordecki, W. and T. Łuczak, On the connectivity of random subsets of projective spaces	(1–3)	207–217
Liaw, S.-C. and G.J. Chang, Rabin numbers of Butterfly networks	(1–3)	219–227
Linek, V. and Z. Jiang, Hooked k-extended Skolem sequences	(1–3)	229–238
Łuczak, T., see W. Kordecki	(1–3)	207–217
Panda, B.S., The forbidden subgraph characterization of directed vertex graphs	(1–3)	239–256
Pavčević, M.-O. and E. Spence, Some new symmetric designs with $\lambda = 10$ having an automorphism of order 5	(1–3)	257–266
Rodríguez, J.A. and J.L.A. Yebra, Bounding the diameter and the mean distance of a graph from its eigenvalues: Laplacian versus adjacency matrix methods	(1–3)	267–275
Ryjáček, Z., see J. Brousek	(1–3)	29– 50
Spence, E., see M.-O. Pavčević	(1–3)	257–266
Yang, Z., On F-Hamiltonian graphs (*Note*)	(1–3)	281–286
Yebra, J.L.A., see J.A. Rodríguez	(1–3)	267–275
Zhang, Z., A kind of bionomial identity (*Note*)	(1–3)	291–298
Zhang, Z., A binomial identity related to Calkin's (*Note*)	(1–3)	287–289
Zhu, X., see T. Dinski	(1–3)	109–115
